AMPTENNIA

'80

Ticking away the moments that make up a dull day
You fritter and waste the hours in an off-hand way.
And then one day you find ten years have got behind you.
No one told you when to run, you missed the starting gun,
And you run and you run to catch up with the sun but it's sinking
And racing around to come up behind you again.
Every year is getting shorter, never seem to find the time.
The time is gone, the song is over, thought . . .
I'd something more to say.

Many people do not realize the important part the Atlas Cement Company has played in the sculpting of the Lehigh Valley. Not only did it provide the area with jobs, but it also helped to build the town of Northampton into what it is today.

In 1871 in Coplay, David O'Saylor built the first Portland Cement Company, which launched the cement industry in the United States. Quickly the Lehigh Valley became known as the cement capital of the world.

In fact, the giant of this industry was located in our own backyard, even on the very site of this school.

The Atlas Cement Company was organized in the late nineteenth century and consisted of 762 acres of land, which formerly had been divided into twelve farms. According to a 1913 survey, this land was underlain with the finest of cement rock.

The Atlas consisted of five plants which were located in close proximity to the high school. Number four, located to the East of us, is probably the most famous of the plants for here was located a government laboratory called the Isthmian Canal Commission Laboratory. In this lab all the cement bound for the Panama Canal was tested.

In the 1930's United States Steel bought both the Universal and the Atlas cement companies and combined them to form the Universal Atlas Cement Company.

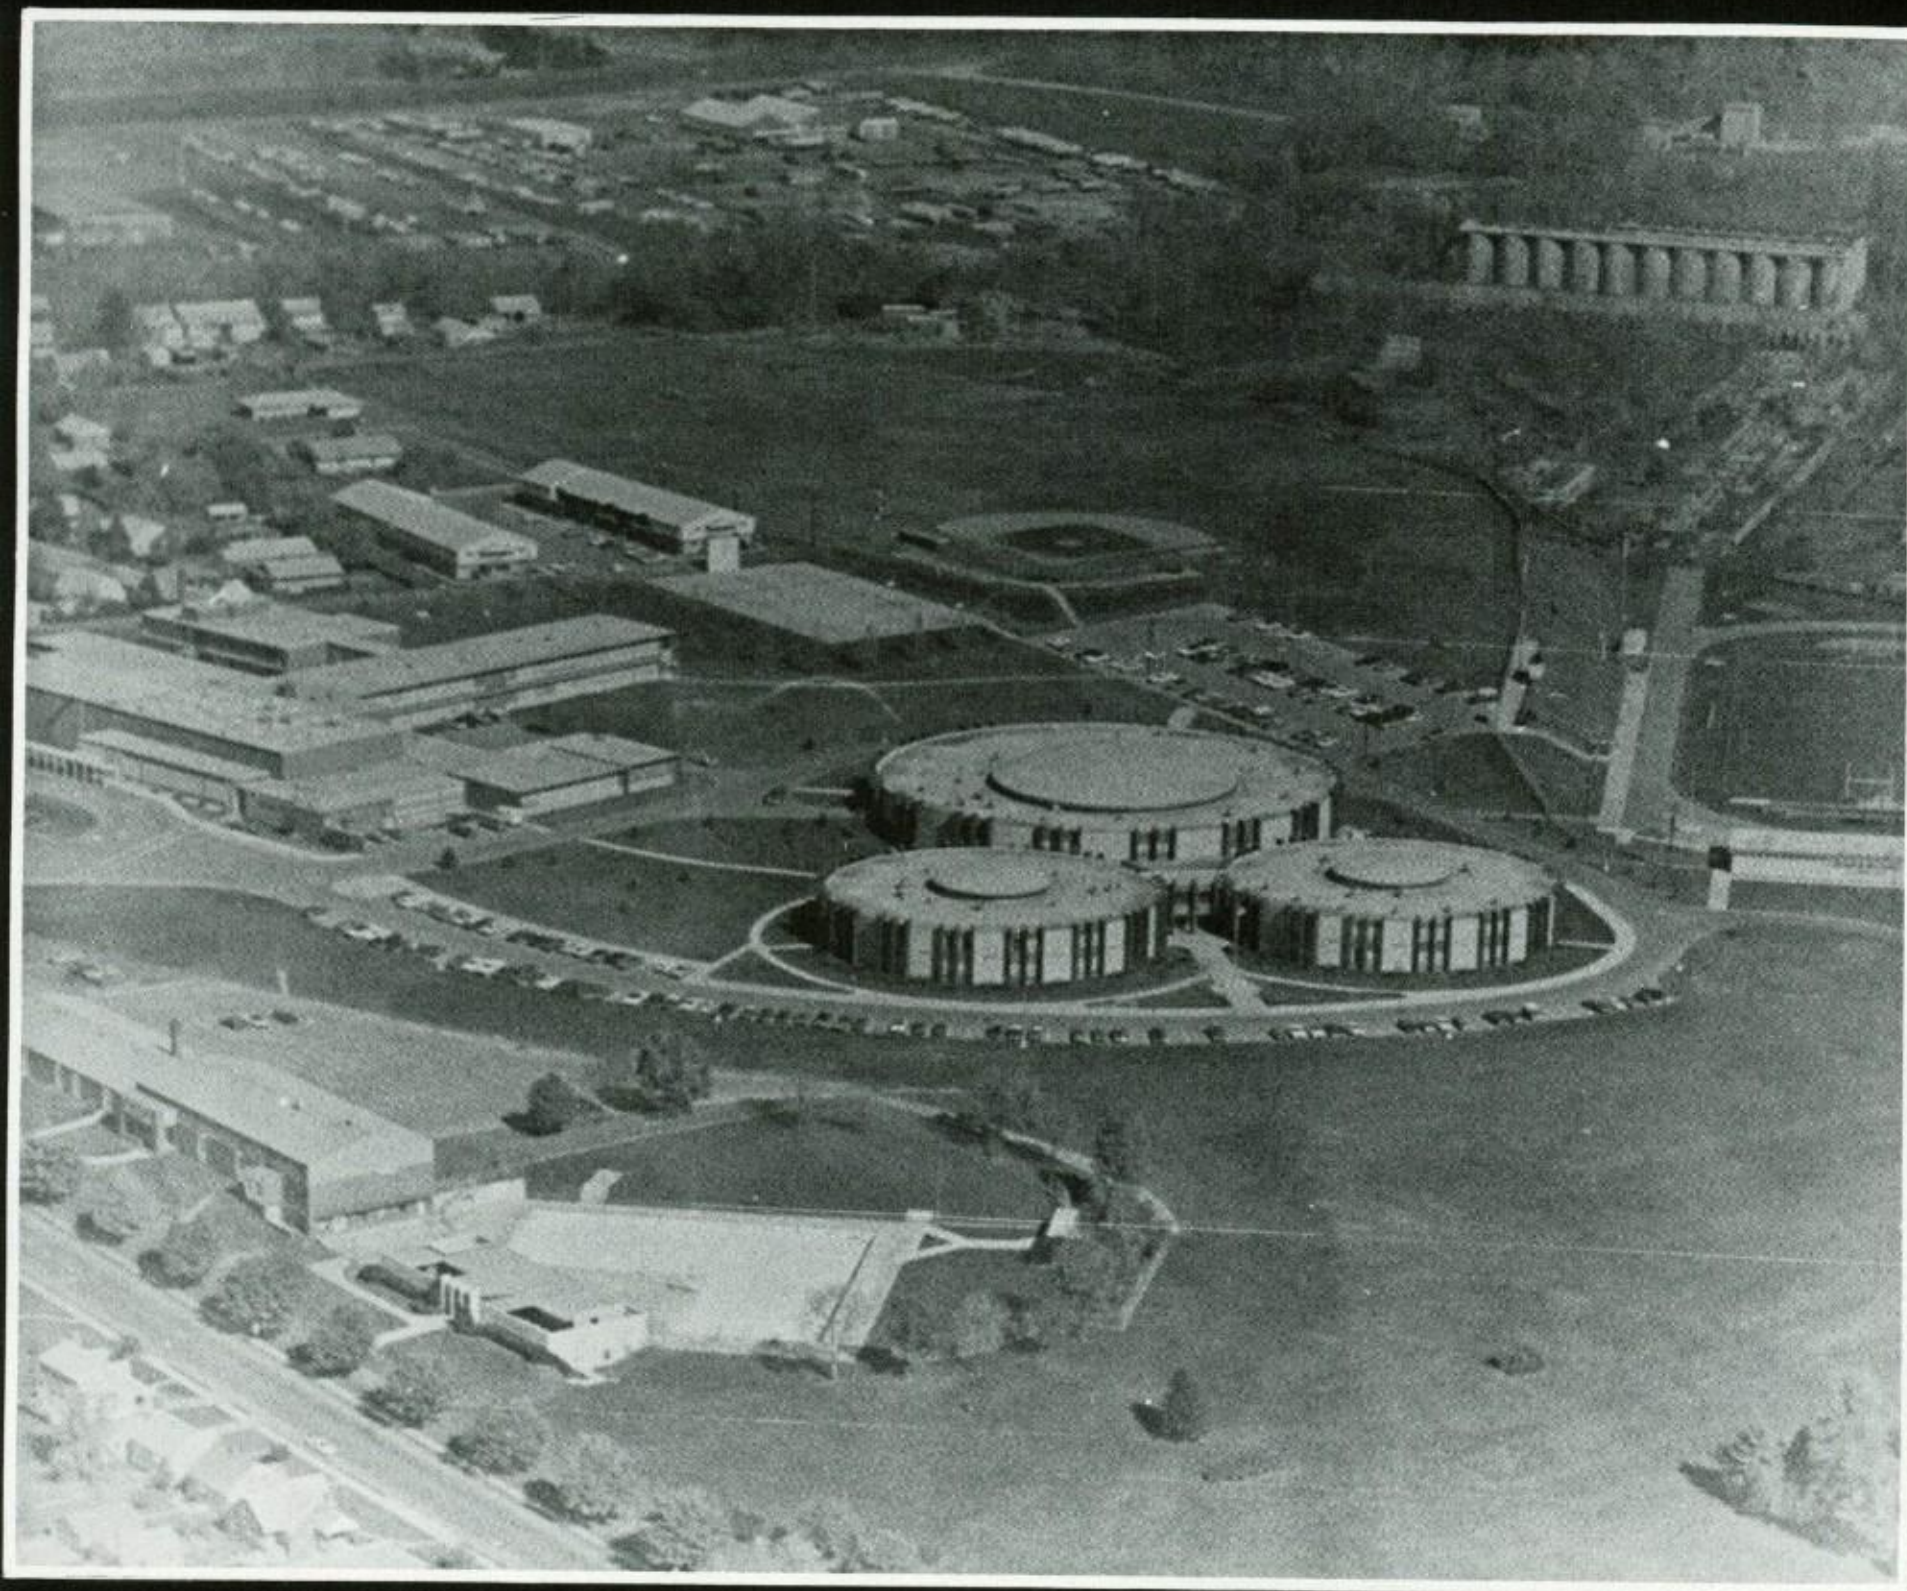

The Atlas contributed much to this community. The company donated land upon which sits the community center, community park, band shell, Al Erdosy Field, Vot-tech building, junior high school, and senior high school.

Unfortunately, due to economic reasons, the Universal Atlas Cement Company has been forced to shut down a large portion of its plant.

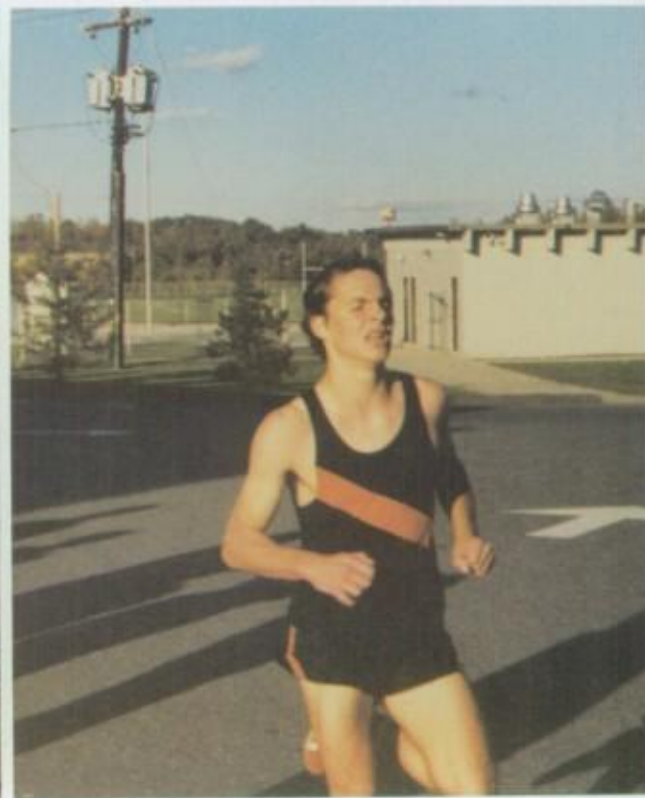

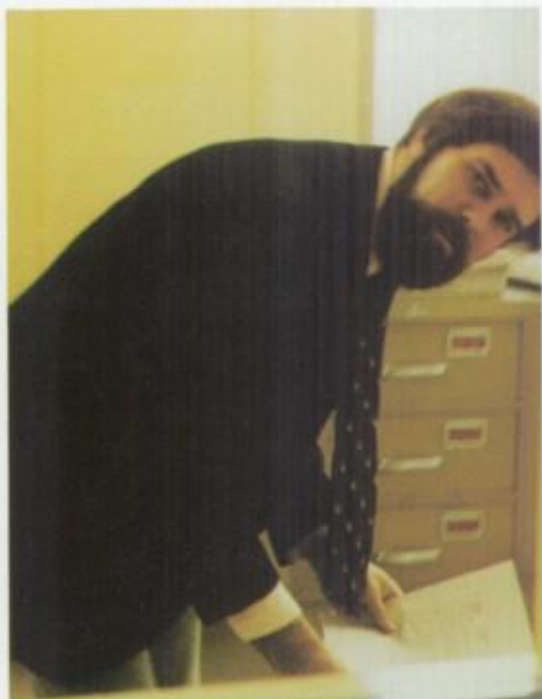

We feel the Atlas has played an indispensable role in the growth and development of this area and is a page of history that should not be forgotten.

We dedicate our 1980 yearbook to the Atlas as our way of saying thank-you.

Opposite page: an aerial view of the land donated by the Atlas Cement Company.

In Memoriam

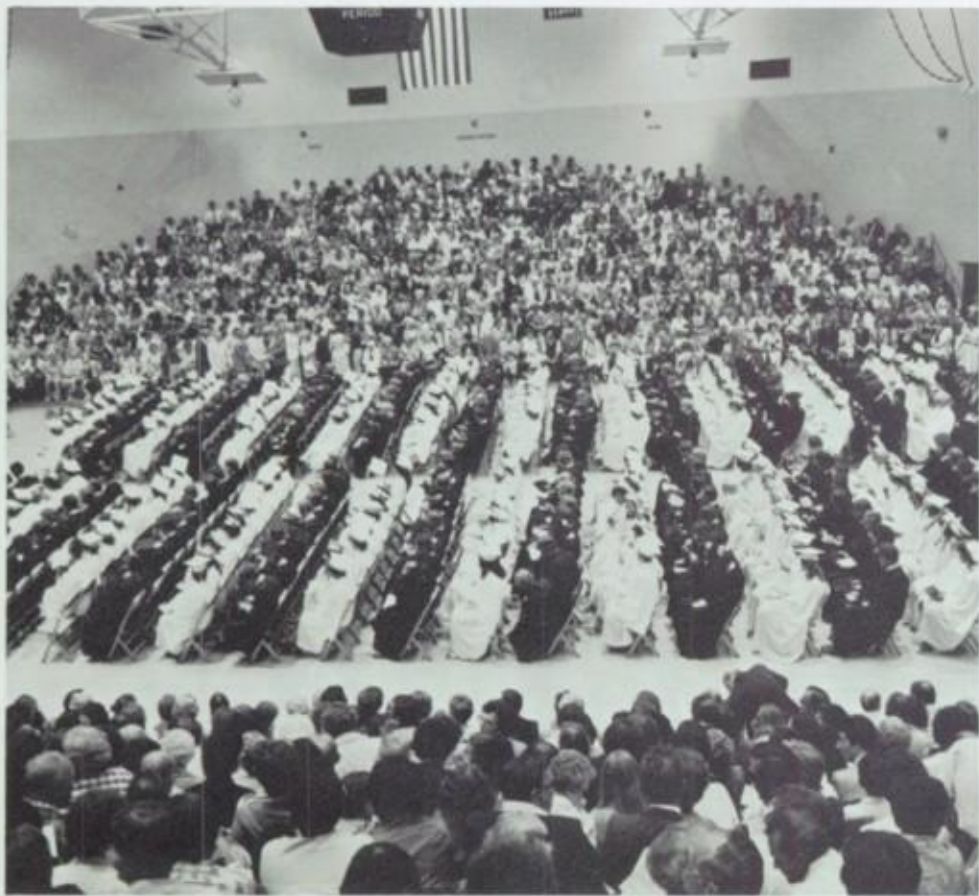

Joan Marie Gonzalez
August 29, 1962 - May 4, 1980

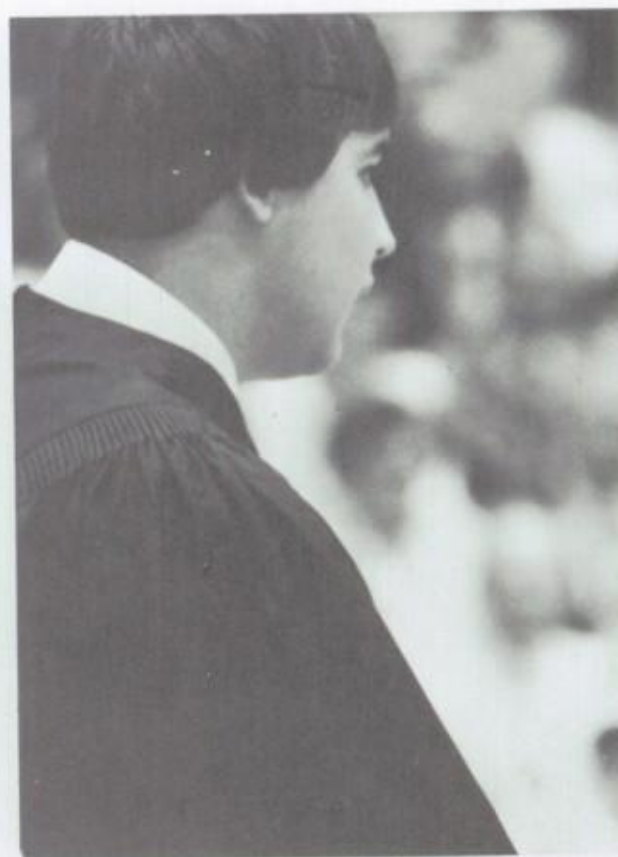

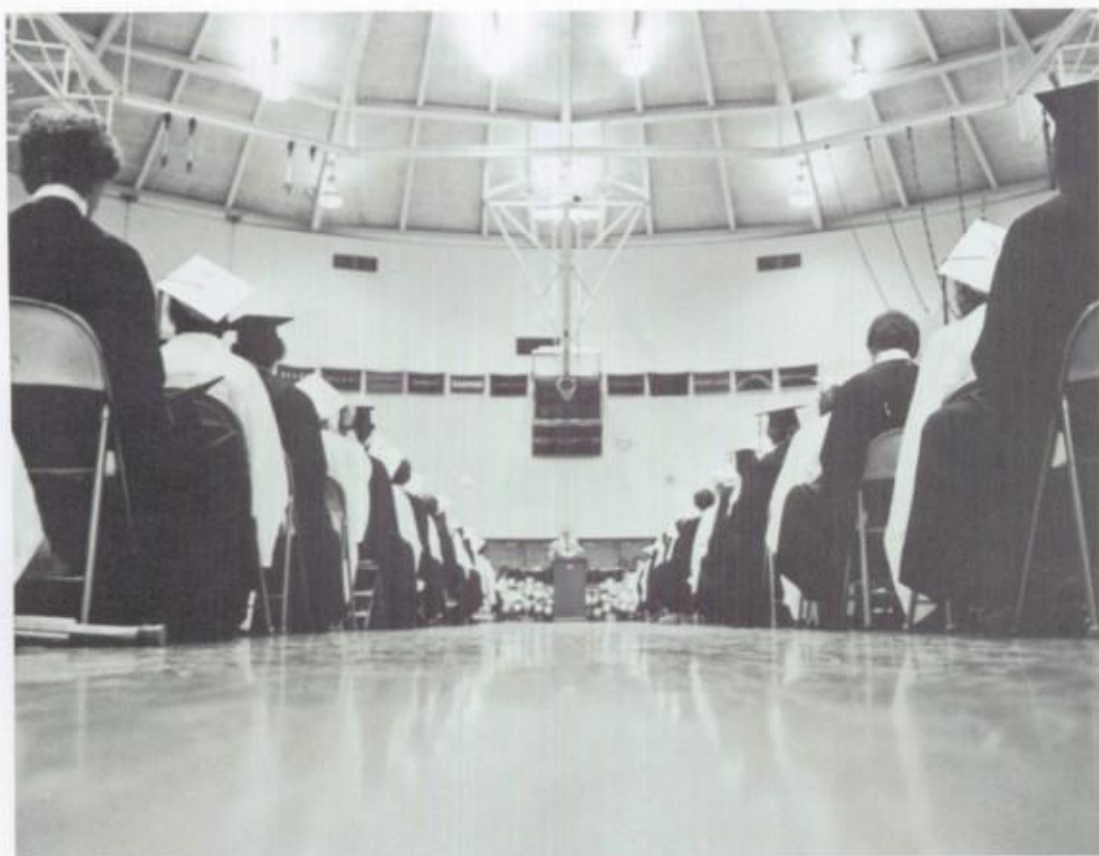

Despite all the hardships in her life, Joan Gonzalez got along well with everyone. The few friends she was close to were enriched by her being there. She was an inspiration to all who knew her. She loved life while she had the chance and was always there to listen. She was a member of the drama club and was a fine student in the clerical course. Her love for people and life was made evident in her choice of a future career as an airlines secretary. Joan was a foster child currently living with the Sharers of Walnutport whom she loved as her own. Joan lost her battle with leukemia on May 4, 1980, after a long struggle. All who knew her believe she hung on as long as she possibly could. We are all saddened by Joan's absence and will remember her always.

When I Must Leave You

When I must leave you,
for a little while,
Please do not grieve
and shed wild tears
And hug your sorrow
to you through the years
But start out bravely
with a gallant smile;
And for my sake
and in my name
Live on and do
all things the same.

Feed not your loneliness
on empty days
But fill each waking hour
in useful ways
Reach out your hand
in comfort and in cheer
And I in turn will comfort you
and hold you near;
And never, never
be afraid to die
For I am waiting
for you in the sky.
